

# Milk Bottle Planters

By Mrs Thomas

# Milk Bottle Family

# Step One

---

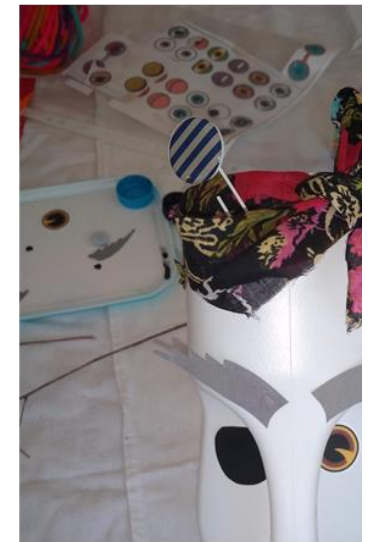

- Find a milk bottle (keep the lid on)
- Cut about 6cm off the end

# Step Two

- Start to Decorate!
- You can use anything you like to design your milk bottle:
  - Card
  - Coloured Paper
  - Fabric
  - Buttons
  - Paperclips
  - Pegs
  - Grasses
  - Pens
- Use staples, glue, and Sellotape to attach them

# Step Three

---

- Place a plant pot with your bean or sunflower in the milk bottle, and put it in a sunny spot.
- When the plant gets too big, it's time to plant it out into the garden.
- Take the plant pot out of the bottle, and place the milk bottle on to the soil (remember to take off the lid).
- Fill the bottle with compost.
- Push a large cane through the top of the milk bottle, to secure it to the ground.
- Replant your bean into the bottle.
- Watch it grow, and remember to water it

I hope you enjoy making a milk bottle planter!
