14th September

Dear Parents/Carers

In Science this term, Year 5 are looking at the life cycles of flowering plants. Over the next few weeks we will be looking at how seeds are formed in plants and how they are then dispersed. To help teach the children about this, we thought it would be good to give them the opportunity to find some examples of seed dispersal for themselves...and with Eaton Park on our doorstep, what better opportunity than that?

On Wednesday 16th September (5MC) and Thursday 17th September (5HH) we will be heading to Eaton Park for a seed hunt. Children will be supervised by school staff at all times and will leave school after lunchtime, returning by the end of the school day. Children will not need to bring anything on the trip, but please make sure that they have a waterproof coat in school on that day and comfortable shoes (school shoes or trainers should be fine) - the forecast looks good!

If you have any queries regarding this visit then please contact the school office.

Yours faithfully,

Mrs. L. Henery

Mr M Caston
